SUMMARY

AI/ML-focused Computer Science student with experience in machine learning, deep learning, and data analytics. Developed ransomware detection models using supervised, unsupervised, and reinforcement learning. Skilled in Python, YOLOv8, and full-stack development.

EDUCATION

2023–Present	B.Tech in Computer Science Engineering, Anurag Engineering College
2021–2023	Intermediate, Kavitha Junior College
2021	SSC, Chaitanya High School

Skills

Programming	Python, Java
Web	HTML, CSS, JavaScript, React.js
Backend	Python, REST APIs
Database	MySQL
AI/ML	SVM, Random Forest, K-Means, YOLOv8
Tools	Git, GitHub, Linux, Streamlit
Core CS	OOPS, Data Structures and Algorithms
Certifications	Data Science, Cybersecurity (TASK), Agentic AI

PROJECTS

Traffic Accident Analysis & Hotspot Detection

Analyzed accident data by time, weather, and severity. Applied K-Means clustering to identify high-risk zones and visualize patterns using Matplotlib.

Smart Car Parking System (YOLOv8)

Developed real-time vehicle detection using YOLOv8 and built React frontend to display parking slot availability dynamically.

Resume Builder Platform

Designed frontend and MySQL database; implemented backend using Python for dynamic resume generation.

WORK EXPERIENCE

Research Intern — IIITDM Kancheepuram 2025

- Developed ransomware detection models using SVM, Random Forest, and K-Means
- Built preprocessing pipelines and anomaly detection systems
- Applied reinforcement learning for adaptive threat detection

Data Science Intern — CodTech IT Solutions 2025

- Built traffic accident analysis system using Python and Pandas
- Performed EDA and applied K-Means clustering for hotspot detection
- Generated insights using data visualization techniques

ACHIEVEMENTS

- Golden Performer — Campus Ambassador, Emertxe Technologies
- SRM Smart Park Hackathon Participant
- District Handball Player — Suryapet (CM Cup)
